Q. **Reference: CA-NLH-024**

The response to the request for a table showing hourly generation (MW) for the Holyrood TGS for the periods November 1, 2024 to April 30, 2025, and November 1, 2025 to April 30, 2026 provided a source reference as Hydro's Monthly Energy Supply Reports (Appendix B). Please provide the hourly data as requested.

A. It is Newfoundland and Labrador Hydro's ("Hydro") opinion that the requested hourly generation data is not necessary for a satisfactory understanding of the matters to be considered in the 2027 Capital Budget Application as required by the Board of Commissioners of Public Utilities ("Board"). The requested information would require the extraction and compilation of a significant volume of operational data that Hydro does not rely upon in support of this Application.

However, Hydro notes that Daily Island Supply and Demand Reports are publicly available on the Board's website.
