Q. **Reference: Renew Diesel Units (2027); Response to PUB-NLH-034**

Has Hydro completed the jurisdictional review of other Canadian utilities serving prime power diesel communities?

A. Newfoundland and Labrador Hydro ("Hydro") has not completed a jurisdictional review of other Canadian utilities; however it has discussed its approach with other utilities. In May 2026, Hydro presented its "Renew Diesel Units" strategy at the Prime Power Diesel Inter Utility conference in Iqaluit, Nunavut. The presentation sparked discussion on other attending utility approaches. After seeing Hydro's positive results, many of the other utilities have started to review their own overhaul/renew strategies to optimize cost, reliability, downtime, asset life, etc.
