

- 1 **Q. (Reference Application, Schedule B, page 4) It is stated “It is estimated that**
2 **customer rates for approximately 10,000 street lights will be reduced by**
3 **between 12% and 44% in 2025 by executing this project.” Will these savings**
4 **be allocated to the Street and Area Lighting Class only, or will other customer**
5 **classes also benefit? Are any of NP’s other customer classes realizing benefits**
6 **of this magnitude owing to capital programs? If so, please identify the**
7 **programs.**
- 8
- 9 A. The customer rates for Light Emitting Diode (“LED”) street light fixtures were approved
10 by the Board in Order No. P.U. 2 (2019), which were based on the lower cost of service
11 associated with the LED fixtures. The revenues and costs associated with the street
12 lighting class are allocated to that class of service.
- 13
- 14 There are currently no other capital programs or projects that result in customer rate
15 reductions of a similar magnitude.
