

1 **Q. (Reference Schedule B, LED Street Lighting Replacement) When HPS**
2 **fixtures are replaced with LED ones, is the opportunity used to address**
3 **any other deficiencies with the pole or its equipment?**
4

5 **A.** Yes, opportunities to address other deficiencies are evaluated during the replacement of
6 an HPS street light fixture with an LED street light fixture. If feasible, the responding crew
7 will make the repairs during the same site visit as the street light replacement. If the crew
8 cannot make the necessary repairs during that time, the deficiencies are documented and
9 scheduled for repair in the future.
