

1 Q. Please provide Hydro's best- and worst-case estimates of the time required for
2 carrying out these steps.

3

4

5 A. Hydro and Newfoundland Power have not yet estimated the time required for
6 carrying out the steps indicated by GRK-NLH-076, specifically "the design, approval,
7 and implementation of new CDM programs" once the potential study is completed.

8 The CDM potential study will provide the framework for developing new CDM

9 programs. Until the study is completed, it would be premature to estimate the

10 timing for new program development that will be completed in partnership with

11 Newfoundland Power.
