

1 Q. Reference: Energy Supply Risk Assessment Update, November 30, 2016, pages 36
2 and 37. Please provide revised Tables 9, 10 and 11 for a revised study period
3 extended to the winter 2021-2022, inclusive.
4

5

6

7 A. The forecast used in Hydro's Energy Supply Risk Assessment is derived from Hydro's
8 Operating Load Forecast. Hydro's Operating Load Forecast is prepared annually and
9 provides Hydro's operating outlook for a five-year period. The winter 2021-2022
10 period falls outside of this five year period.

11

12 Hydro will be preparing and issuing a new Operating Load Forecast in the spring of
13 2017. This forecast will include winter 2021-2022. Hydro will provide the Board with
the revised Tables requested above at that time.
